### Verint Networked Video Solution Selected for AirTrain JFK

#### Solution Will Help Enhance Security Across Light Rail System

**MELVILLE, N.Y., October 12, 2005** – Verint Systems Inc. (NASDAQ: VRNT), a leading provider of analytic software-based solutions for communications interception, networked video security and business intelligence, announced today that its Networked Video Solution has been selected to enhance security for AirTrain JFK. AirTrain JFK is managed by The Port Authority of New York and New Jersey, which maintains the bridges, tunnels, bus terminals, airports, PATH and seaports that are critical to the region's trade and transportation capabilities.

AirTrain JFK is an 8.1-mile light rail system that connects JFK airport to the New York City area's mass transit system. AirTrain enables thousands of air travelers and airport employees to travel to and from one of the world's busiest airports every day. AirTrain also serves as an on-airport transportation service, taking travelers between the airline terminals, rental car facilities, hotel shuttles, and airport parking lots.

The Verint Networked Video Solution will enable Port Authority police to enhance security of the rail system by centrally monitoring elevators, passenger platforms and certain parts of the track from a central operations center. The solution will be delivered in conjunction with Verint partner IK Systems, Inc. of Victor, NY.

"We are pleased to expand our relationship with the Port Authority of New York and New Jersey and to help them enhance security for AirTrain JFK," said Dan Bodner, President and CEO of Verint Systems Inc. "We have significant experience working with transportation authorities and are committed to delivering innovative networked video solutions to enhance security for the mass transit industry."

Verint's Network Video Solution, Nextiva™, enables organizations of all sizes, from small and mid-sized enterprises to major government and commercial organizations, to enhance the security of their facilities and infrastructure and the performance of their business operations by networking video across multiple locations and applying advanced content analytics to extract actionable intelligence from live and stored video. By alerting security personnel to potential security threats, Nextiva helps organizations prevent security breaches, improve response time and enhance operational efficiency.

#### About Verint Systems Inc.

Verint® Systems Inc., headquartered in Melville, New York, is a leading provider of analytic software-based solutions for communications interception, networked video security and business intelligence. Verint software, which is used by over 1,000 organizations in over 50 countries worldwide, generates actionable intelligence through the collection, retention and analysis of voice, fax, video, email, Internet and data transmissions from multiple communications networks.
